GURAMRIT GREWAL

Wolverhampton, UK

Portfolio: g-grewal-98.github.io/

PROFILE

Retail professional and science graduate (2:1) with practical purchasing, supplier coordination and Excel analysis experience. Helped secure eight wholesale accounts and developed a tool covering 100+ products to compare margins, demand and reorder timing. Seeking a procurement or commercial support role, bringing customer-facing experience and a public analytics portfolio focused on pricing and stock decisions.

KEY SKILLS

Supplier sourcing and communication • Purchasing support • Pricing and margin analysis • Stock monitoring and replenishment • Customer service • Excel reporting

WORK EXPERIENCE

Shop Assistant | Vino Kinver Convenience Store, Kinver, Stourbridge

September 2019 – Present

- Handled wholesale applications and supplier follow-up, helping secure eight approved accounts and access to additional product ranges.
- Independently selected 60 products for a wholesale application that required evidence of a retail range, comparing wholesale costs with market selling prices.
- Compare supplier costs, availability and volume discounts with market prices and customer demand to support purchasing decisions.
- Coordinate with suppliers on pricing, order quantities and deliveries; investigate invoice, price and quantity discrepancies and follow up to resolve them.
- Use sales information, stock levels and customer feedback to assess replenishment needs and evaluate potential new products.
- Recommend suitable products through needs-based customer conversations and maintain positive customer relationships.
- Support financial administration and quarterly tax-return preparation using Excel while balancing customer service, stock and supplier enquiries.

WORKPLACE EXCEL PROJECT

Purchasing and inventory tool | Vino Kinver

- Built an Excel tool covering 100+ products to compare purchase costs, selling prices, margins and demand.
- Added pricing, stock-cover and reorder calculations for existing stock and potential new products.

ANALYTICS PORTFOLIO

Procurement analytics portfolio | Excel, SQL and reporting, 2026

Project examining which wholesale offers meet a target margin and when bulk buying justifies the cash and stock commitment. Extends a 240-product purchasing workbook; the public edition uses 12 fictional products to protect commercial information.

- Models VAT-aware gross margin, contribution after payment fees, bulk cash requirements and stock cover. Includes an editable Excel workbook and interactive target-margin scenarios.
- Uses exact-match, date and availability rules to select comparable benchmarks, keeping missing prices and evidence exceptions visible.
- Includes a reproducible Python/SQLite pipeline with CTEs, joins and window functions. Excel results are reconciled with SQL; 33 automated checks cover calculations, duplicate keys and evidence-selection rules.
- Includes a separate SQL comparison of six fictional offers from two suppliers, respecting minimum quantities. Power Query imports, DAX measures and a Power BI report specification are supplied; Desktop validation remains outstanding.

TECHNICAL SKILLS

Excel: PivotTables, PivotCharts, XLOOKUP, SUMIFS, COUNTIFS and IF/AND/OR; sales, margin, variance and inventory analysis.

SQL — practical learning: Filtering, sorting and aggregation; GROUP BY and HAVING; INNER JOIN and LEFT JOIN to combine related datasets.

Python — project-based experience: CSV ingestion, SQLite queries, JSON exports and calculation checks in the procurement pipeline.

Power Query — practical learning: Importing, cleaning and combining data; data types and missing-value handling.

Power BI and DAX — practical learning: Table relationships, fact and dimension structures, KPI cards, charts, slicers and basic measures.

Other software: Microsoft Word and PowerPoint.

EDUCATION

BSc (Hons) Bioveterinary Sciences — 2:1

Royal Veterinary College, University of London | September 2016 – June 2019

Research, statistical analysis and scientific data interpretation; evaluating complex information to support evidence-based conclusions.

A levels | Adams' Grammar School

Biology, Chemistry and Mathematics

Full UK Driving Licence
